

### Boston kiosk

The Boston. Small footprint, large screen and built in privacy, are just a few of the virtues the Boston kiosk possesses. Understanding the user needs privacy the Boston Kiosk offers a monitor that is tilted backward to make close viewing easy and shoulder surfing hard. The Boston offers many of the same features but in a smaller and sleeker footprint.

Besides being functional and private, the Boston is big on features. It is available factory equipped with large touch screens, printers, scanners, bar code readers, card readers, and thermal printers. There is also an optional 19" LCD screen for advertising.
