Better kiosks through intelligent design...

Monte Carlo Gaming Kiosk

Data Sheet

*A brightly illuminated kiosk built to drive player loyalty and build casino brands*

From managing loyalty programs and resort rewards, to queue-busting and self-check-in/check-out, the Monte Carlo Gaming Kiosk performs as great as it looks. Our latest winner for casinos features card-printing and vibrant LED lighting that can be controlled remotely or programmed, and its sleek design fits in any décor, in any use across the casino/resort property. Robust components stand up to 24/7 use, even in smoking areas, while two large LCD panels create a rewarding touch experience for users and highly visible digital signage for advertising, wayfinding and more.
