Better kiosks through intelligent design...

Data Sheet

The Sleek and modern Austin Desktop Kiosk.

Invite your customers to a place they're familiar with, the counter. Enjoy the same functionality and components as the freestanding model with a refreshing touch on a familiar concept. Don't skip a beat with getting your customers to switch to self-service. Front service door allows quick access to change paper on the fly. The compact footprint easily sits on your counter without absorbing much of the valuable space. The Austin Desktop is likely one of the greater designs Olea has come forth with in our 40 years of solution development. Often times it's hard to create a compact solution without sacrificing serviceability and functionality. This Desktop evades that notion perfectly.
