

Irvine Temperature Screening Kiosk

SLIM FOOTPRINT, POWERFUL PREVENTION

Protect Your Investment

Your people are your most valuable investment.

To help stem the crisis and optimize a return to business, hospitals, grocery stores, and retailers and a host of other companies will look to temperature screening as employees report to work and venues open up again. This first layer of screening can help curb the spread of virus as well as prevent costly and time consuming contamination clean-up.

The Temperature Screening Kiosk is equipped with an infrared temperature sensor/detector and the system provides an alert if an individual has an elevated body temperature.

- Reduce risk of exposure by infected persons*
- Maintain a safe work/business environment
- No-contact screening
- Streamline your screening process and reduce operational costs
- Avoid costly contamination clean-up
- Reduce stress and anxiety for employees and guests

For a dental office, it is extremely important to maintain a clean and safe environment not only for the patients but more importantly, for the staff. The temperature-sensing kiosk has become an indispensable tool to easily, quickly, and accurately measure patients' and staff's temperatures. Of all the equipment I've had to acquire and add to the office in preparation of reopening, the temperature- sensing kiosk has been my best investment.

A CLOSER LOOK

SPECIFICATIONS

- Uses an algorithm for object heat and fast detection temperature accuracy
- +/- 0.5 degrees Celsius
- Android Operating System and Software included
- 1 second refresh rate
- High temperature visual alert is configurable
- Audible alert also available
- Scans people from 20 to 39 inches from kiosk
- Stand-alone indoor kiosk
- Kiosk can be re-purposed with a number of different applications
- This device meets FDA guidelines for non-medical screening purposes

STANDARD SPECS

- 22" Tablet
- Durable powder coat paint finish
- 16 Gauge Galvanized Steel
- Security Locks
- Internal 6-outlet power strip w/ surge protection
- Topple resistant base plate with ability to bolt to ground

Olea Kiosks. Redefining Self-Service Technology.

DIMENSIONS

Freestanding

- 20.6"w x 58.10"h x 20.00"d
- Base plate: 20.63"w x 20.00"d

Desktop

- 20.6"w x 18.67"h x 10.85"d
- Base plate: 15.48"w x 9.50"d

*This solution is designed to detect temperature abnormalities. The IR sensor in the kiosk is measuring the skin surface temperature. There are many factors, including environmental and physiological that can impact a person's surface temperature reading. Skin surface temperature vs. actual core body temperature may differ either way. This temperature screening solution must be operated in accordance with the manufacturer's user guide. It is not intended nor designed to diagnose or detect medical conditions including, but not limited to, viruses or other illnesses. It should only be used to detect variations in surface temperature. If an elevated skin temperature is detected, the subject should be advised to check temperature with an approved medical thermometer as measurement confirmation. Absence of an elevated skin temperature does not preclude a fever. Medical testing is necessary to determine presence or absence of infectious disease. This is not an approved FDA medical device.

**The IR sensor has been calibrated with a thermal black body at the factory. When the sensor activates, it takes 2-3 minutes to auto calibrate to reach thermal stability. The IR sensor will auto calibrate upon system boot up.

Re-purpose The Irvine Temperature Screening Kiosk

The current pandemic situation suggests that we are going to continue to use temperature screening kiosks to reduce the risk of virus exposure for employees and guests in the near-term, but we all know there is a future beyond Covid-19.

We're prepared to help our customers continue their transition to the future. We've established a solutions marketplace to help our customers re-purpose these kiosks post-pandemic and ensure our customers continue to get value from these kiosks for years to come.

The Irvine Temperature Screening kiosk is sleek, intelligent, and deceptively versatile. It provides a number of options for its second life including the following applications:

- Virtual Receptionist
- Wayfinding
- Digital Signage/Information
- Vendor Sign-in
- Guest Sign-in
- Loyalty or Rewards Program
- Retail/Endless Aisle
- QSR/Food Ordering

We have a number of software providers in our marketplace and we continue to grow the list of partners and applications to ensure our customers continue to see value in their self-service technology for years to come.

If you'd like more information about the Irvine Temperature Screening Kiosk and the Olea Application Marketplace, please contact us at info@olea.com or visit our website at www.olea.com.
