

GENEVA KIOSKS

DATA SHEET PERFECTLY PROPORTIONED

Built for High Volume, Upscale Hospitality and Entertainment

The Geneva's modular and reconfigurable elements provide the freedom to deliver creative and elegant self-service solutions with a clean simplicity. It's extremely functional, yet very stylish for today's attractions and hospitality industry.

Available in both indoor and outdoor models, the consistent design makes it easy for guests to identify self-service options across your property. It's a sophisticated robust solution with front access to quickly and easily change paper or perform other maintenance.

BRINGING EXCELLENCE TO THE GUEST EXPERIENCE

- Ticketing
- Food Ordering
- Retail
- Check-in / Check-out
- Wayfinding

GENEVA KIOSK

PERFECTLY PROPORTIONED WITH ITS LONG, SLEEK DISPLAY FOR GUESTS TO QUICKLY IDENTIFY SELF-SERVICE OPTIONS.

The Geneva Kiosk was designed to be ultra-versatile for a variety of environments, both indoor and outdoor. This high-performance solution was built with a flexible component cavity to accommodate the necessary technology to deliver the ultimate guest experience.

Its 27" monitor increases the interactive real estate and still provides elegant, clean simplicity.

- Payment devices can be positioned below the monitor or as side components.
- Component cavity can hold a variety of combinations of ticket, wristband and receipt printers as well as an option for bill and coin acceptors.
- The kiosk is serviced from the front to allow for easy maintenance and paper changes.

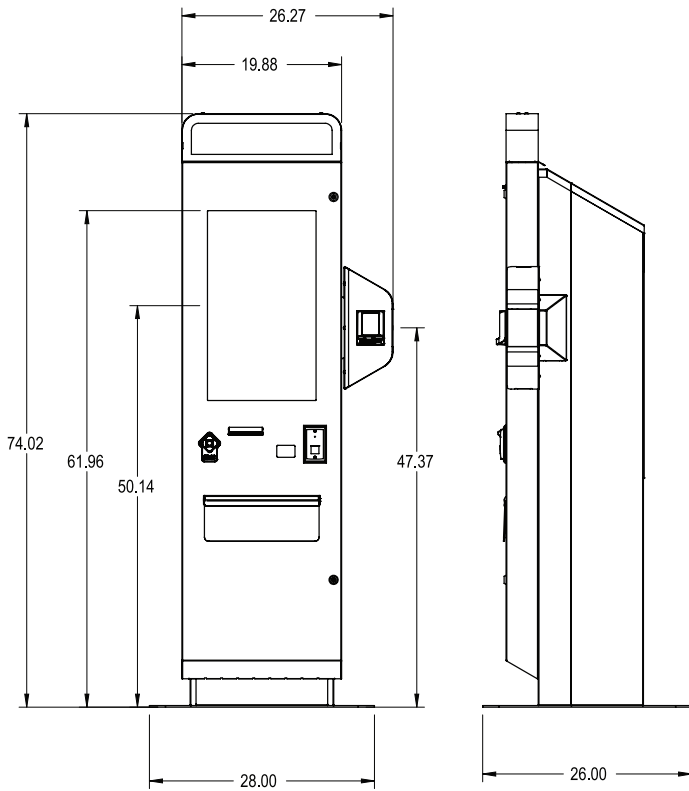

With its aesthetics, performance and quality, the Geneva is the perfect solution for high-volume attractions and hospitality.
