

MILAN PORTRAIT KIOSK

DATA SHEET

MODULAR INTERACTIVE DIGITAL SIGNAGE KIOSK

Self-service on a larger scale

Available with three different touch-monitor sizes, the versatile and visually stunning Milan is a superior solution for any facility that needs to inform, direct or influence visitors.

This pedestal-style kiosk was developed for interactive digital signage applications and can accommodate virtually any single or multi-touch LCD monitor, with the option to split the screen for multiple applications, such as retail and wayfinding.

BRINGING EXCELLENCE TO THE GUEST EXPERIENCE

- Retail
- Wayfinding
- Interactive digital signage
- Ticketing
- Virtual receptionist
- Product demonstrations
- Information
- Casino loyalty programs
- Concessions
- Check-in / Check-out

MILAN PORTRAIT KIOSK

**SLEEK, FRIENDLY, AND INTERACTIVE DIGITAL DISPLAY THAT
WILL IMPRESS YOUR GUESTS AS MUCH AS IT HELPS THEM**

Make an impact with the Milan Portrait Kiosk. This stunning pedestal style kiosk was developed for interactive digital signage applications, but due to its incredible adaptability, the Milan is well suited for a number of other roles, such as wayfinding, ticketing, virtual receptionist and more.

It features high-grade digital signage monitors built for 24/7, year-round operation. This kiosk can accommodate virtually any single or multi-touch LCD monitor with the option to orient it to portrait or landscape mode.

Because the Milan accommodates larger monitors, it allows deployers to install split-screen application functionality: part of the screen can show images of a product, for example, while another part can display a map to its location in the store.

The Milan can be configured with multiple peripherals, including thermal printers, media players, magnetic and smart card readers, proximity sensors, web cams and QR/barcode scanners.

The Milan. Performance on a pedestal.

A CLOSER LOOK

MILAN PORTRAIT
